MULTI PURPOSE DRILL BIT

METAL

WOOD

TILE

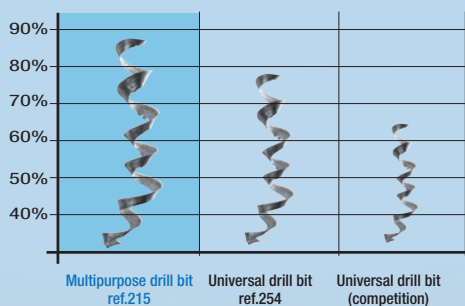

DIAGER®
INNOVATION

- CARBIDE TIP 118 ° WITH 4 SHARPENED EDGES
- SELF CENTERING POINT for an easier and faster penetration.

- OPTIMIZED "S" GROUND FLUTE for a better clearance and dust removal (metal, concrete, wood).
- SPECIAL THIN LAND to reduce friction and avoid any overheating's risk; perfect for energy saving on cordless tools.

TESTS RESULTS :

Test made by Diager on our electronic benching test in oak wood (50 mm thick) with a speed of 3 000 rpm.

EFFICIENT

Easy drilling into hard wood and materials, as glazed surfaces and thick slates.

RESISTANT

Drills without any problem in "sandwich pannels".

ACCURATE

Clean and perfect holes without chipping.

Ref.215

Available range :

Ø mm : 5-6-8-10-12

Ø inches : 3/16-15/64-5/16

25/64-15/32"

Advises: for the best results : start drilling through the softest to the hardest material by using rotation only and hammering effect for concrete. Appropriate use will increase its life time.

Packaging :
Individual sleeve-pack

DIAGER®
